

Our Vision

Our vision is based on the values and the principles of the School Partnership Trust Academies. We pride ourselves on being:

- An academy with high expectations both for the individual and with a collective responsibility for raising community aspirations.
- A caring academy, based upon social responsibility, honesty, equality and consideration for others.
- An academy where self-help, self-determination and self-improvement are encouraged.
- An innovative centre of learning which develops lively and enquiring minds for both students and staff.
- An academy which promotes inclusion rather than exclusion and by working in partnership with local agencies and offering a personalised curriculum for all, we will strive to adopt a zero exclusion policy.
- An academy where courtesy, co-operation, enterprise and initiatives are paramount and where tolerance rather than intolerance is practised.
- An academy which is the centre of the community as a resource, in its services to others and in promoting community and social cohesion.
- An academy where no individual is left behind and where all pupils of any age or background are provided with the support to become responsible and successful citizens.
